The charges will be determined with reference to cargo carrying capacity of the vessels, as applicable to coastal vessel engaged in coastal shipping. If there is no rate available in any other Major Port Trusts or if the rate available is not representative enough of the proposed new cargo/service/facility, then the port would file the proposal for notification of tariff for the said new

		cargo/equipment/service with reference to optimal capacity assessed following the principles of 2008 guidelines or based on rated capacity or technical specification /facility /equipment.
		If determination of tariff based on the above prescribed options is not possible, then KOPT after giving sufficient reasons would proposed rates based on cost plus 16% return formula.

	(d)	The final rate fixed by the TAMP for new cargo/service for which rate is not prescribed in the Scale of Rates of KOPT will ordinarily be effective only prospectively. The interim rate adopted in an ad hoc manner will be recognised as such unless it is found to be excessive requiring some moderation retrospectively.
(xx)	(a)	The rates prescribed in this Scale of Rates are ceiling levels; likewise, rebates and discounts prescribed are floor levels. KoPT may, if it so desires, charge lower rates and/ or allow higher rebates and discounts.
	(b)	KoPT may also, if it so desires, rationalize the prescribed conditionality governing the application of rates prescribed in the Scale of Rates if such rationalization gives relief to the user in rate per unit and the unit rates prescribed in the Scale of Rates do not exceed the ceiling levels.
	(c)	Provided that KoPT should notify the public such lower rates and / or rationalization of the conditionality governing the application of such rates and continue to notify the public any further changes in such lower rates and / or in the conditionality governing the application of such rates provided the new rates fixed shall not exceed the rates notified by the TAMP.
(xxi)		Taxes, Duties, etc. as may be levied by the State or Central Govt. or any legal/Statutory Authority from time to time, shall have to be paid extra.

(xxiii)	ANNU	JAL ESCALATION (Except for SOR prescribed under Part – X)
		The SOR (except Part – X) is subject to automatic annual indexation at 100% of the WPI to be annually announced by the Authority. The next annual indexation will be from 1 May 2020 subject to the either of KDS or HDC or both achieving the Performance Standards prescribed in below. If Performance Standards prescribed in the SOR are not achieved, there will be no indexation in SOR for that particular year. In case any dock system is able to achieve the performance standard set for it and the other does not, then the dock system which is able to achieve the performance standard set for it would be eligible for the automatic annual indexation. In case any Dock System achieves the benchmark for any one for more than one activity but is not able to achieve the performance standard set for other activities, the concerned dock system would be eligible for the automatic annual indexation of the activity against which it is able to achieve the performance benchmark.
	(b)	The port should declare the Performance Standards achieved by it annually for the period 1 January to 31 December vis-à-vis the Performance Standards notified by the Authority at the level committed by the port within one month of end of the calendar year to the concerned users as well as to the Authority. If the Performance Standards as notified by the Authority are achieved by the port, then the port will automatically index the SOR at 100% of WPI announced by the Authority and apply the indexed SOR w.e.f. 1 May of the relevant year. The SOR indexed by the KOPT to be intimated by the port to the concerned users and to the Authority.

For unloading of Dry Bulk Cargo from dumpers without requiring any labour or equipment support no charge shall be levied. However, if for any reason labour and/or equipment are required for unloading of dry bulk cargo from dumpers, the rate specified under S.9.1 (6) shall be levied.

	the vessel, for loading / unloading of dry bulk cargo at any MHC Berth.	98.68	100.54
	Note:		
	(a) Calculation of productivity would be done by the following formula:		
	Productivity=Total cargo loaded / unloaded from a vessel (in tonne) x 24		
	Vessel operation time (in hours)		

The vessel Operation time shall be assessed in hours by KOPT and to be computed from readiness of the vessel to load/unload cargo to Finished Work Time of the vessel. However, in case of stoppage of work of the vessel due to		
--	--	--

reasons not attributable to the Port, such stoppage of work would be deducted from the vessel operation time, for the purpose of computation of MLP

- (b) The prescribed rate is a base rate for achieving Minimum Level of Productivity (MLP) of 20000 MT per day by using two MHCs.
- (c). If productivity more than the MLP is achieved, then the user will pay an additional 10% of the base rate only on the additional cargo handled over and above the MLP. The additional cargo on which additional levy of 10% will be levied be computed as follows:

(Total cargo loaded/ unloaded) – MLPx Vessel Operation Time

(d). If a productivity less than the MLP is achieved, then the following rates will be levied:

Ship berth day output actually achieved per vessel basis	Amount payable as percentage of base rate
From 18000 tonnes to 19999	90%
From 16000 tonnes to 17999	80%
From 14000 tonnes to 15999	60%
Loop than 14000 tanner	400/

Less than 14000 tonnes

(e) In case of deployment of one MHC the prescribed minimum level of productivity (MLP) shall be 10000 MT per day. The applicable rate for achieving higher productivity would be as per note (c) above. If a productivity less than the MLP (of 10000 MT per day) is achieved, then the following rates will be levied:

Penalty / Incentive Norms:

For the purpose of calculation of the productivity, the working time of the vessel will be calculated from haul in time till completion of cargo work. For failure or success in achieving the stipulated discharge rate, penalty/ incentive will be applicable as follows:

- (a) If the working time of the vessel (considering hauled in time till completion of cargo work) exceeds the stipulated time based on the above productivity norms by 2 hours or less, then no penalty will be levied
- (b) If the working time of the vessel (considering hauled in time till completion of cargo work) exceeds the stipulated time based on the above productivity norms beyond 2 hours, then penalty will be levied @ 2 times of the normal berth hire charge for every additional hours or part thereof taken to complete the cargo operations of the vessel.
- (c) If the vessel's pumping rate exceeds the Benchmark Pumping rate, then incentive will be provided as per the following:

If the working time of the vessel (considering hauled in time till completion of cargo work) is lower than the stipulated time by more than 2 hours, then incentive will be paid @ 5% of the applicable berth hire charges for every additional hour saved. However, there will be no incentive for saving of time up to 2 hours.

Note to provisions regarding Penalty/ Incentive Norms:

- (i) For calculation of the stipulated working period in hours the cargo tonnage will be divided by the Pumping Rate Norms and the same will be compared with the actual working period of the ship to be ascertained from the operational records.
- (ii) For non-achievement of the performance as stated at (i) above, the penalty will be imposed on the ship's owner / agent. Similarly, for achieving higher performance, the incentive will be paid at the proposed rate to the ship owner/ agent.
- (iii) If Propane & Butane are discharged simultaneously even for a smaller period, the benchmark pumping rate prescribed for **Simultaneous discharge of Butane & Propane** would be applicable for calculating penalty / incentives. However, for discharging Propane & Butane or some other cargoes one by one, hauled in time to finished work time of the first cargo and finished work time of 1st cargo to finished work of 2nd cargo is to be considered for calculating penalty/incentives. More so, in case of simultaneous discharge of cargo other than Propane & Butane, duration from Hauled in Time to Finished Work Time (for the 1st cargo) and Finished Work Time of 1st / previous cargo to Finished Work Time (for 2nd cargo) is to be considered.
- S.21.5.2 Due to non-achieving of benchmark Pumping Rate or any other reason attributable to the vessel, if the sailing of the Vessel is delayed and consequently a vessel called from Sand head /anchorage point for berthing in place of the vessel so delayed is required to be sent back to Sandhead /anchorage; the pilotage/shifting charge for the said movement of the incoming vessels shall be recovered from the vessel which overstayed at Berth.

(ii). Penalty/Incentive:

- (a). The stipulated time for a vessel's stayal at berth will be calculated based on the Benchmark performance norms as mentioned above.
- (b). For failure or success in achieving the stipulated time at berth, penalty / incentive will be applicable as per the provision given below:
 - (i). It the actual working period of the ship (time between berthing at the working berth till completion of vessel's operation) remains within 5% (higher or lower) of the stipulated time for that commodity, then no penalty / incentive will be levied / paid.
 - (ii). In case where actual working period of the ship (time between berthing at the working berth till completion of vessel's operation) exceeds 5% of the stipulated time for that commodity, penalty will be levied @ 2 times of the normal berth hire charges for additional hours taken to complete the ship's cargo operation.
 - (iii). In cases where actual working period of the ship (time between berthing at the working berth till completion of vessel's operation) is lower than the stipulated time by more than 5% of the same then incentive will be paid at the rate of berth hire charges for every additional hour saved.

Note to provisions regarding penalty / incentives norms:

- (i). For the purpose of calculation of time for computation of penalty / incentive, fraction of an hour will be considered as full hour.
- (ii). In computing actual performance achieved by each ship for the purpose of calculating penalty / incentive and stoppage of operation on account of port related or weather related issues will be discounted. Such exclusions are listed below:
- (a). Breakdown / non-availability of port provided equipment at berth.
- (b). Weather related stoppage
- (c). Shifting of ships between berths on account of port.
- (d). Time consumed for each draft surveys upto maximum period of 30 minutes
- (e). Any other reason which are beyond the control of vessel, Importer / Exporter or Handling Agent.
