TRADE CIRCULAR

Sub: Handling of Baby Cape vessels having LOA from 230m to 260m , at
Sagar Anchorage in foul weather months (April to October).

In partial modification of the previous Trade Circular No. Mrn/4E/140 dated 18.4.2020, in order to optimize utilization of Sagar Anchorage for lighterage/topping up operation, it has been decided to accept Baby Cape vessels having LOA from 230m to 260m in foul weather months with a range of tide not exceeding 4.0m. However, once the vessel is called at Sagar, she will be allowed to continue her cargo work even if the range of tide exceeds 4.0 mtrs.

A retired pilot on contract will remain on board during the vessel`s entire stay at anchorage for safety reasons.
