|         | (c)   | Provided that KoPT should notify the public such lower rates and / or rationalization of the conditionality governing the application of such rates and continue to notify the public any further changes in such lower rates and / or in the conditionality governing the application of such rates provided the new rates fixed shall not exceed the rates notified by the TAMP.   |

If Performance Standards prescribed in the SOR are not achieved, there will be no indexation in SOR for that particular year. In case any dock system is able to achieve the performance standard set for it and the other does not, then the dock system which is able to achieve the performance standard set for it would be eligible for the automatic annual indexation. In case any Dock System achieves the benchmark for any one for more than one activity but is not able to achieve the performance standard set for other activities, the concerned dock system would be eligible for the automatic annual indexation of the activity against which it is able to achieve the performance benchmark. |

reasons not attributable to the Port, such stoppage of work would be deducted from the vessel operation time, for the purpose of computation of MLP

- (b) The prescribed rate is a base rate for achieving Minimum Level of Productivity (MLP) of 20000 MT per day by using two MHCs.
- (c). If productivity more than the MLP is achieved, then the user will pay an additional 10% of the base rate only on the additional cargo handled over and above the MLP. The additional cargo on which additional levy of 10% will be levied be computed as follows:

(Total cargo loaded/ unloaded) – MLPx Vessel Operation Time 24

(d). If a productivity less than the MLP is achieved, then the following rates will be levied:

| Ship berth day output actually achieved per vessel basis | Amount payable as<br>percentage of base<br>rate |

| From 18000 tonnes to 19999                               | 90%   |

(e) In case of deployment of one MHC the prescribed minimum level of productivity (MLP) shall be 10000 MT per day. The applicable rate for achieving higher productivity would be as per note (c) above. If a productivity less than the MLP (of 10000 MT per day) is achieved, then the following rates will be levied:

#### **Penalty / Incentive Norms:**

For the purpose of calculation of the productivity, the working time of the vessel will be calculated from haul in time till completion of cargo work. For failure or success in achieving the stipulated discharge rate, penalty/ incentive will be applicable as follows:

- (a) If the working time of the vessel (considering hauled in time till completion of cargo work) exceeds the stipulated time based on the above productivity norms by 2 hours or less, then no penalty will be levied
- (b) If the working time of the vessel (considering hauled in time till completion of cargo work) exceeds the stipulated time based on the above productivity norms beyond 2 hours, then penalty will be levied @ 2 times of the normal berth hire charge for every additional hours or part thereof taken to complete the cargo operations of the vessel.
- (c) If the vessel's pumping rate exceeds the Benchmark Pumping rate, then incentive will be provided as per the following:

If the working time of the vessel (considering hauled in time till completion of cargo work) is lower than the stipulated time by more than 2 hours, then incentive will be paid @ 5% of the applicable berth hire charges for every additional hour saved. However, there will be no incentive for saving of time up to 2 hours.

#### Note to provisions regarding Penalty/ Incentive Norms:

- (i) For calculation of the stipulated working period in hours the cargo tonnage will be divided by the Pumping Rate Norms and the same will be compared with the actual working period of the ship to be ascertained from the operational records.
- (ii) For non-achievement of the performance as stated at (i) above, the penalty will be imposed on the ship's owner / agent. Similarly, for achieving higher performance, the incentive will be paid at the proposed rate to the ship owner/agent.
- (iii) If Propane & Butane are discharged simultaneously even for a smaller period, the benchmark pumping rate prescribed for **Simultaneous discharge of Butane & Propane** would be applicable for calculating penalty / incentives. However, for discharging Propane & Butane or some other cargoes one by one, hauled in time to finished work time of the first cargo and finished work time of 1st cargo to finished work of 2nd cargo is to be considered for calculating penalty/incentives. More so, in case of simultaneous discharge of cargo other than Propane & Butane, duration from Hauled in Time to Finished Work Time(forthe1stcargo)andFinishedWorkTimeof1st/previous cargo to Finished Work Time (for 2nd cargo) is to be considered.
- S.21.5.2 Due to non-achieving of benchmark Pumping Rate or any other reason attributable to the vessel, if the sailing of the Vessel is delayed and consequently a vessel called from Sand head /anchorage point for berthing in place of the vessel so delayed is required to be sent back to Sandhead /anchorage; the pilotage/shifting charge for the said movement of the incoming vessels shall be recovered from the vessel which overstayed at Berth.
- S.21.6 Performance norm based incentive / penalty for conventional berths using ship's gears, in respect of dry bulk cargo handled at Haldia Dock Complex (HDC).

#### (ii). Penalty/Incentive:

- (a). The stipulated time for a vessel's stayal at berth will be calculated based on the Benchmark performance norms as mentioned above.
- (b). For failure or success in achieving the stipulated time at berth, penalty / incentive will be applicable as per the provision given below:
  - (i). It the actual working period of the ship (time between berthing at the working berth till completion of vessel's operation) remains within 5% (higher or lower) of the stipulated time for that commodity, then no penalty / incentive will be levied /paid.
  - (ii). In case where actual working period of the ship (time between berthing at the working berth till completion of vessel's operation) exceeds 5% of the stipulated time for that commodity, penalty will be levied @ 2 times of the normal berth hire charges for additional hours taken to complete the ship's cargo operation.
  - (iii). In cases where actual working period of the ship (time between berthing at the working berth till completion of vessel's operation) is lower than the stipulated time by more than 5% of the same then incentive will be paid at the rate of berth hire charges for every additional hour saved.

#### Note to provisions regarding penalty / incentives norms:

- (i). For the purpose of calculation of time for computation of penalty / incentive, fraction of an hour will be considered as full hour.
- (ii). In computing actual performance achieved by each ship for the purpose of calculating penalty / incentive and stoppage of operation on account of port related or weather related issues will be discounted. Such exclusions are listed below:
- (a). Breakdown / non-availability of port provided equipment at berth.
- (b). Weather related stoppage
- (c). Shifting of ships between berths on account of port.
- (d). Time consumed for each draft surveys upto maximum period of 30minutes
- (e). Any other reason which are beyond the control of vessel, Importer / Exporter or Handling Agent.

#### **Penalty / Incentive Norms:**

- (a). For each arrival, ship Berth stay will be calculated based on commodity specific productivity norms and parcel size of vessel.
- (b). If a ship stays within 5% (higher or lower) of the stipulated time for that commodity, then no penalty/ incentive will be levied/paid.
- (c). In case where actual Berth stay is more than 5% higher than the stipulated time, the number of additional hours spent at berth will be penalized by 2 x berth hire.
- (d). In case where actual berth stay is more than 5% lower than the stipulated time, number of additional hours saved will be incentivized at 1 x berth hire.
- (e). In computing actual performance achieved by each ship for the purpose of calculating penalty/ incentive, any stoppage of operation on account of port related or weather related issues will be discounted. Such exclusions will be limited to: (i). Break down / non availability of port provided equipment at berth. (ii). Weather related stoppages (iii). Shifting of ships between berths on account of port. (iv). Any delays in sailing after vessel readiness to sail on account of port i.e pilot/tug unavailability, tidal conditions. (v). Draft surveys within the prescribed norms for ships. As a guideline, maximum 30 mins per party for interim draft survey would be allowed. Any additional time incurred in draft surveys will be considered in berth stay. Where practicable, in case of multi party consignment, common surveyors are to be appointed so as to reduce time lost during interim draft surveys. Vessel Agent / Importers must coordinate and inform port. (vi). Any stoppages because of other reasons are not to be excluded for calculation of performance norms, unless specifically approved by Board."

The same methodology shall also be adopted to calculate the incremental ceiling rate beyond 26000 tonnes with the change that in such case the base rate is increased by 0.5% for first two thousand tonnes, 1% for 2<sup>nd</sup> two thousand tonnes and 1.5% for the third two thousand tonnes. The same methodology shall be adopted to calculate the rate beyond 32000 tonnes.
- (d). #### Note:

To calculate the ceiling rates for performance below 7920 tonnes (for Dry Bulk cargo) and 4224 tonnes (for other Cargo) per WWD as shown above, the base rate was reduced by 2.5% for first five hundred tonnes and for the 2<sup>nd</sup> five hundred tonnes the rate was reduced by 5% of the base rate. Likewise performance below 7000 tonnes (for dry bulk cargo) and 3225 tonnes (for other cargo) per WWD shall be calculated by reducing the base rate accordingly.

The same methodology shall also be adopted to calculate the incremental ceiling rate beyond 7920 tonnes (for Dry Bulk cargo) and 4224 tonnes (for other Cargo) per WW D and in such case the base rate is increased by 2.5% for first five hundred tonnes, 5% for 2<sup>nd</sup> five hundred tones over the base rate. The same methodology shall be adopted to calculate the rate beyond 9000 tonnes (for dry bulk cargo) and 5225 tonnes (for other cargo) per WWD.

The Cargo Transfer Rate shall be computed on WWD basis as per the following formula:

## Total cargo transferred between mother vessel and the barges / daughter vessels x 24 Cargo Transfer Time (in hours)

Immediately after completion of cargo transfer operations, and before the sailing of the Mother Vessel (OGV) from the Transfer Point, Statement of Facts shall be made out duly signed by Master of the Mother Vessel (OGV) and the authorized representatives of the Licensee's Floating Crane and Barge / Daughter Vessel and shall be distributed at the transfer point amongst the following concerns:

- a) Master of the vessel / agents of the vessel.
- b) Representative of Licensee
- c) Representative of the barge / daughter vessel.
- d) The consignee / consigner, if so desires, may also depute their agents / representatives for signing of the SOF.

The Cargo Transfer Time for the purpose of assessment of performance standard of the Floating Crane arrangement to fulfil the provisions of the Scale of Rates of the Floating Crane Charges shall be strictly calculated on the basis of SOF duly signed by the above said parties.

The tariff caps will be indexed to inflation but only to an extent of 60% of the variation in Wholesale Price Index (WPI) occurring between 1 January 2016 and 1 January of the relevant year. Such automatic adjustment of tariff caps will be made every year and the adjusted tariff caps will come into force from 1 April of the relevant year to 31 March of the following year.

The rates approved will come into effect after expiry of 30 days from the date of notification of the Order passed in the Gazette of India and shall remain in force for a period of fifteen years, subject to indexation, as explained above.
